Summerland, BC | (250) 809-5154 | chris@bremmer.ca | linkedin.com/in/cjbremmer

Summary

Results-driven Full Stack Software Developer with 7+ years of experience in designing, developing, and implementing scalable and high-performance applications. Proven ability to lead cross-functional teams, drive innovation, and deliver impactful solutions. Expertise in .NET technologies, database architecture, and Agile methodologies. Passionate about leveraging cutting-edge technologies to solve complex challenges and enhance business outcomes.

Technical Skills

- **Programming Languages:** Full stack, C#, .NET, JavaScript/TypeScript, SQL, VB.NET
- **Frameworks & Tools:** ASP.NET, .NET Core, Angular, Node.js, Entity Framework, MVC, Hibernate, SQL Server Management Studio, Visual Studio
- **Cloud & DevOps:** Azure, AWS, Git, Git Actions, Jenkins, Docker, Jira, Confluence
- **Database:** SQL Server, MySQL, Database Architecture, Liquibase
- **Frontend:** HTML, CSS, Bootstrap, jQuery, Razor, Blazor, MUD
- **Architecture & Design:** Microservices, API Development, Domain-Driven Design (DDD)
- **Agile Methodologies:** Scrum, Kanban

Professional Experience

Database Architect/Team Lead | QHR Technologies | 2019 – 2024

- Architected and maintained scalable database solutions, ensuring data integrity and performance optimization, supporting systems used by over 1500 healthcare providers.
- Led cross-functional teams to implement and standardize HL7 and FHIR protocols, enhancing data exchange across healthcare systems.
- Mentored and guided development teams on SQL best practices and database schema management using Liquibase, improving code quality and consistency.
- Championed Domain-Driven Design (DDD) principles to improve application architecture and maintainability.
- Facilitated Agile ceremonies, including sprint planning, stand-ups, and retrospectives, to enhance team productivity and alignment.

Senior Developer/Database Administrator | SageKey Software | 2008 – 2018

- Led the design and implementation of database architectures for enterprise-scale applications, ensuring data integrity and performance.
- Managed and administered Windows web servers, ensuring security, reducing downtime, and optimizing server performance.

- Collaborated with clients and teams to identify and address database requirements, resulting in optimized data solutions.
- Facilitated the transition to Agile methodologies, fostering collaboration and adaptive planning.

Key Projects/Contributions

- Authored and maintained "SQL Cookbook," a comprehensive guide for developers on creating and testing Liquibase changesets.
- Led the development of D.A.R.T. (Decision Analysis Research Tool) for Pfizer Pharmaceutical.

Professional Development

- Brent Ozar SQL Training
- Eric Evans Domain-Driven Design Workshop
- Microsoft Azure AZ-900 Coursework
